

How do I install the Galileo SSL 3.0.0 upgrade?

To upgrade to the latest version of Galileo SSL please follow the steps below.

1. [Download and save the latest version of Galileo SSL from Travelport Marketplace](#)
2. **Open the folder** where GalileoSSLClient\_v3.0.1.46.zip was downloaded to.
3. **Right Click** on “GalileoSSLClient\_v3.0.1.46.zip”
4. **Click “Extract All”**

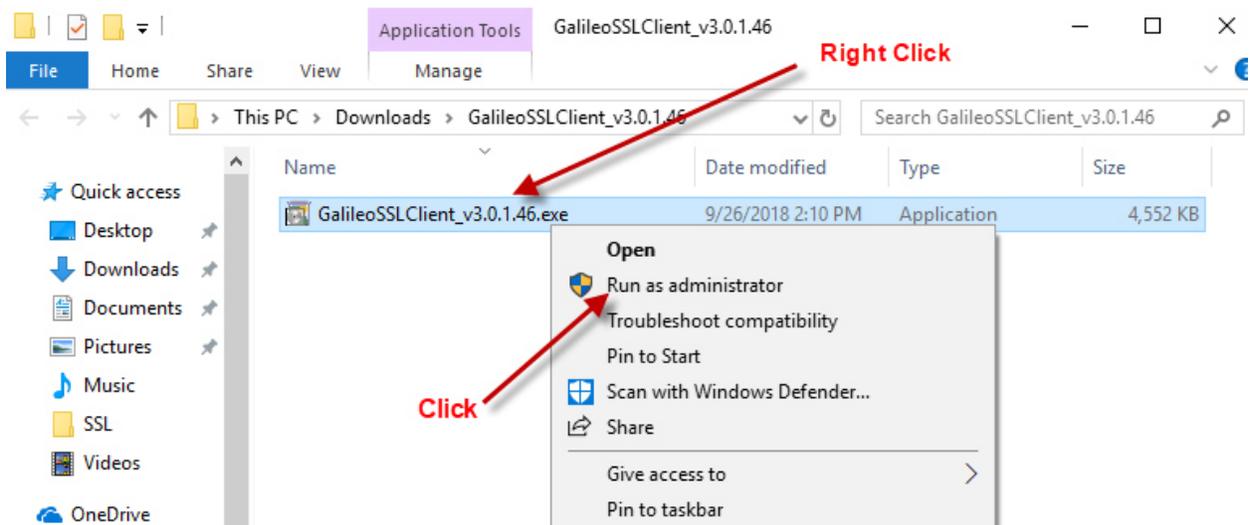

5. **Click “Extract”**

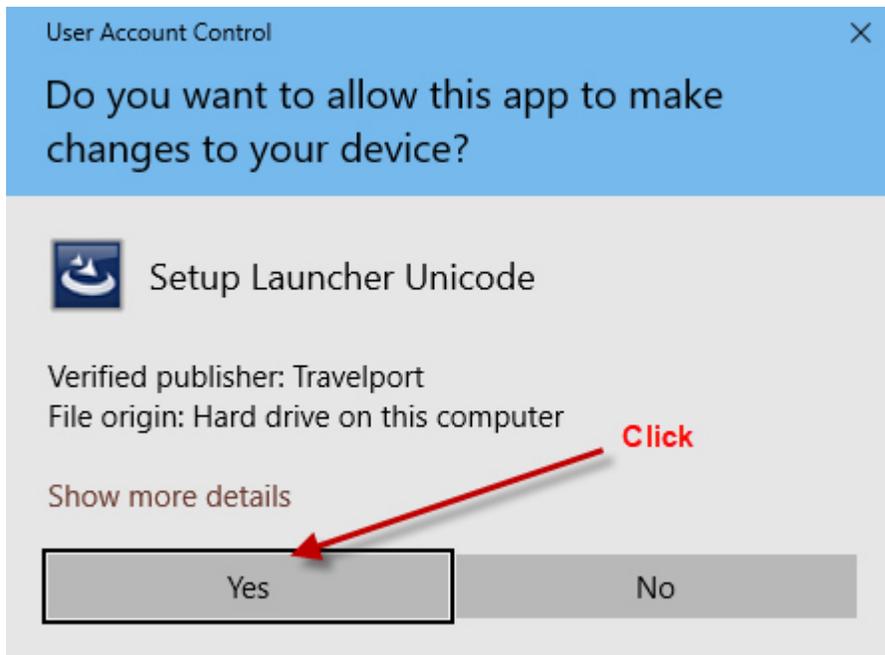

6. **Right Click** “GalileoSSLClient\_v3.0.1.46.exe”

7. **Click “Run as administrator”**

8. **Click “Yes”** if prompted by User Access Control otherwise proceed to step 9

9. **Click “Yes”** if prompted about previous installation of SSL otherwise proceed to step 10.

## Galileo SSL Client Install

A previous installation of Galileo SSL Client has been detected.

This version must be uninstalled before continuing.

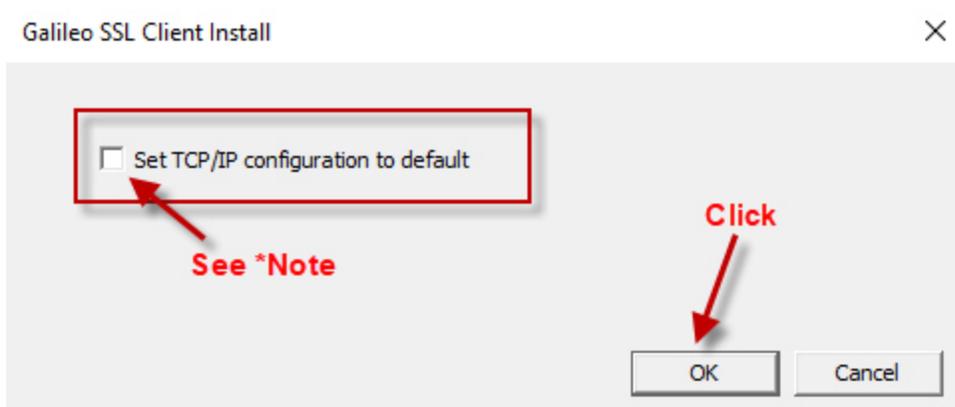

Click Yes to automatically remove the existing version and continue with setup. Click No to cancel.

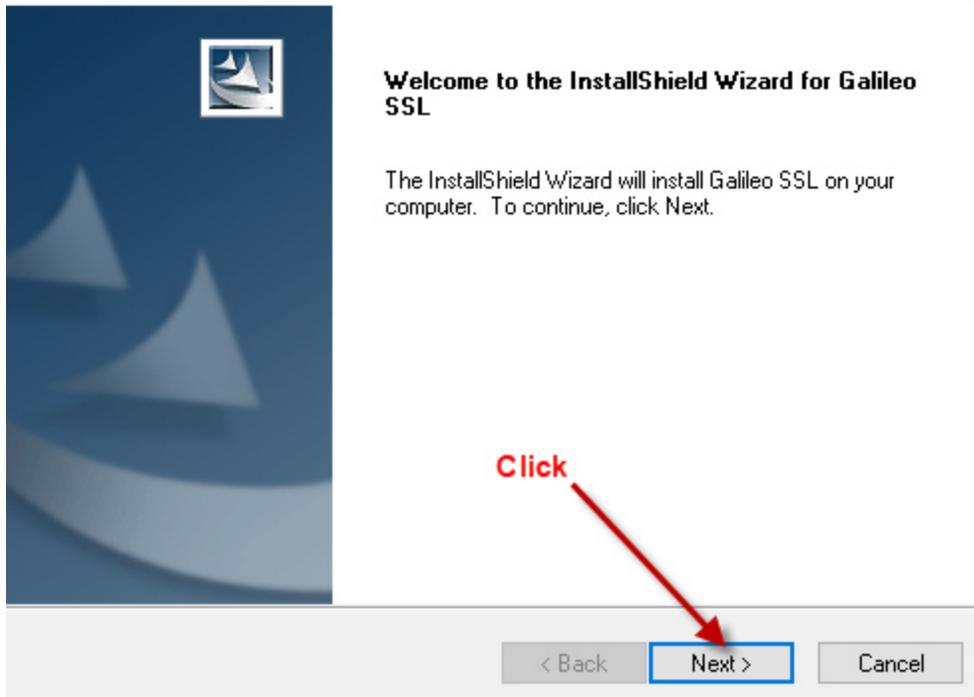

### 10. \*Note:

- If your computer currently has a working SSL configuration the “Set TCP/IP configuration to default” box should be **unchecked**.
- If you wish to **overwrite the current SSL configuration** and replace with the default SSL configuration the “Set TCP/IP configuration to default” box should be **checked**.
- If your company uses a custom SSL configuration such as a proxy or SSL gateway the “Set TCP/IP configuration to default” box should be **unchecked**. If you are unsure if your SSL is configured to use a proxy or SSL gateway check with your IT department before continuing with your SSL installation.

### 11. Click “OK”

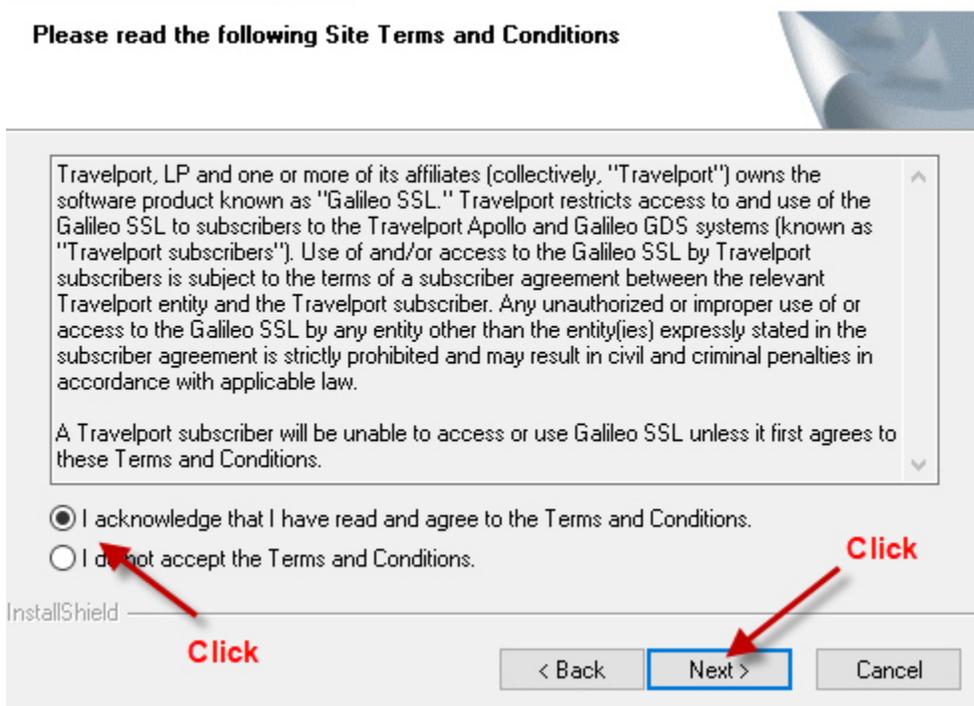

### 12. Click “Next”

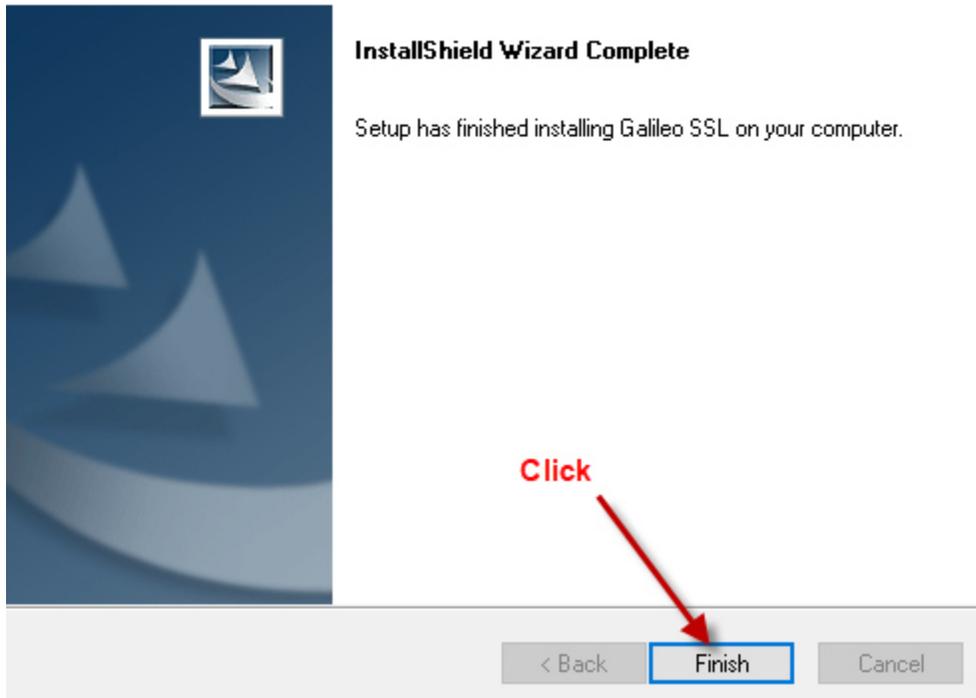

12. Click the **button** to the left of "I acknowledge that I have read and Agree to the Terms and Conditions"

13. Click "Next"

14. Click "Finish"

Galileo SSL - InstallShield Wizard

This completes the installation of Galileo SSL
